About Pancheros

The beginning of Pancheros dates back to 1992 when Rodney Anderson opened the brand’s first restaurant in Iowa City, Iowa. Originally modeled after the Chicago taquerias that Anderson had visited often with his friends during his teenage years, the brand’s pursuit of constructing Burritos Better Built launched Pancheros into a concept based on simplicity and fresh-pressed tortillas.

Since its humble beginnings, Pancheros has earned a loyal following by redefining the standards of modern burritos offering fresh-pressed tortillas and perfectly-mixed ingredients with the help of BOB the Tool, a unique plastic spatula used to carefully mix ingredients together to create the perfect taste in every bite.

Amid its popularity, the brand has successfully grown from its roots and today a robust franchising program has led to approximately 74 locations across 13 states.
